professionals

Testing on physical devices

It's one new
device per day!

Thanks to our solid base of over **4,000** devices in our digital laboratory, we can test all products on **any version requested by our clients**.

Testing in **real-world conditions** that take into account network conditions, battery and hard drive usage, screen size, and more—**factors that emulators cannot account for**.

By using a **data-driven approach**, we can advise our clients on the configurations to test.

Devices

Software

Screen size

The international community

Quality assurance professionals selected and evaluated, experienced and committed to confidentiality, chosen by a Delivery Manager to meet the mission's objectives.

Sandra

WE ARE TESTERS

The hybrid approach

Our digital Lab

Our crowdtesting community
QA Professionals

- **Project Managers**

- Single point of contact for our clients - SPOC
- Bug qualification (completeness, duplicates...)

- **Delivery Managers**

- Recruitment and onboarding of crowd testers
- Ranking and evaluation of crowd testers

- **Test Analysts**

- IoT Testing
- Cross-device testing

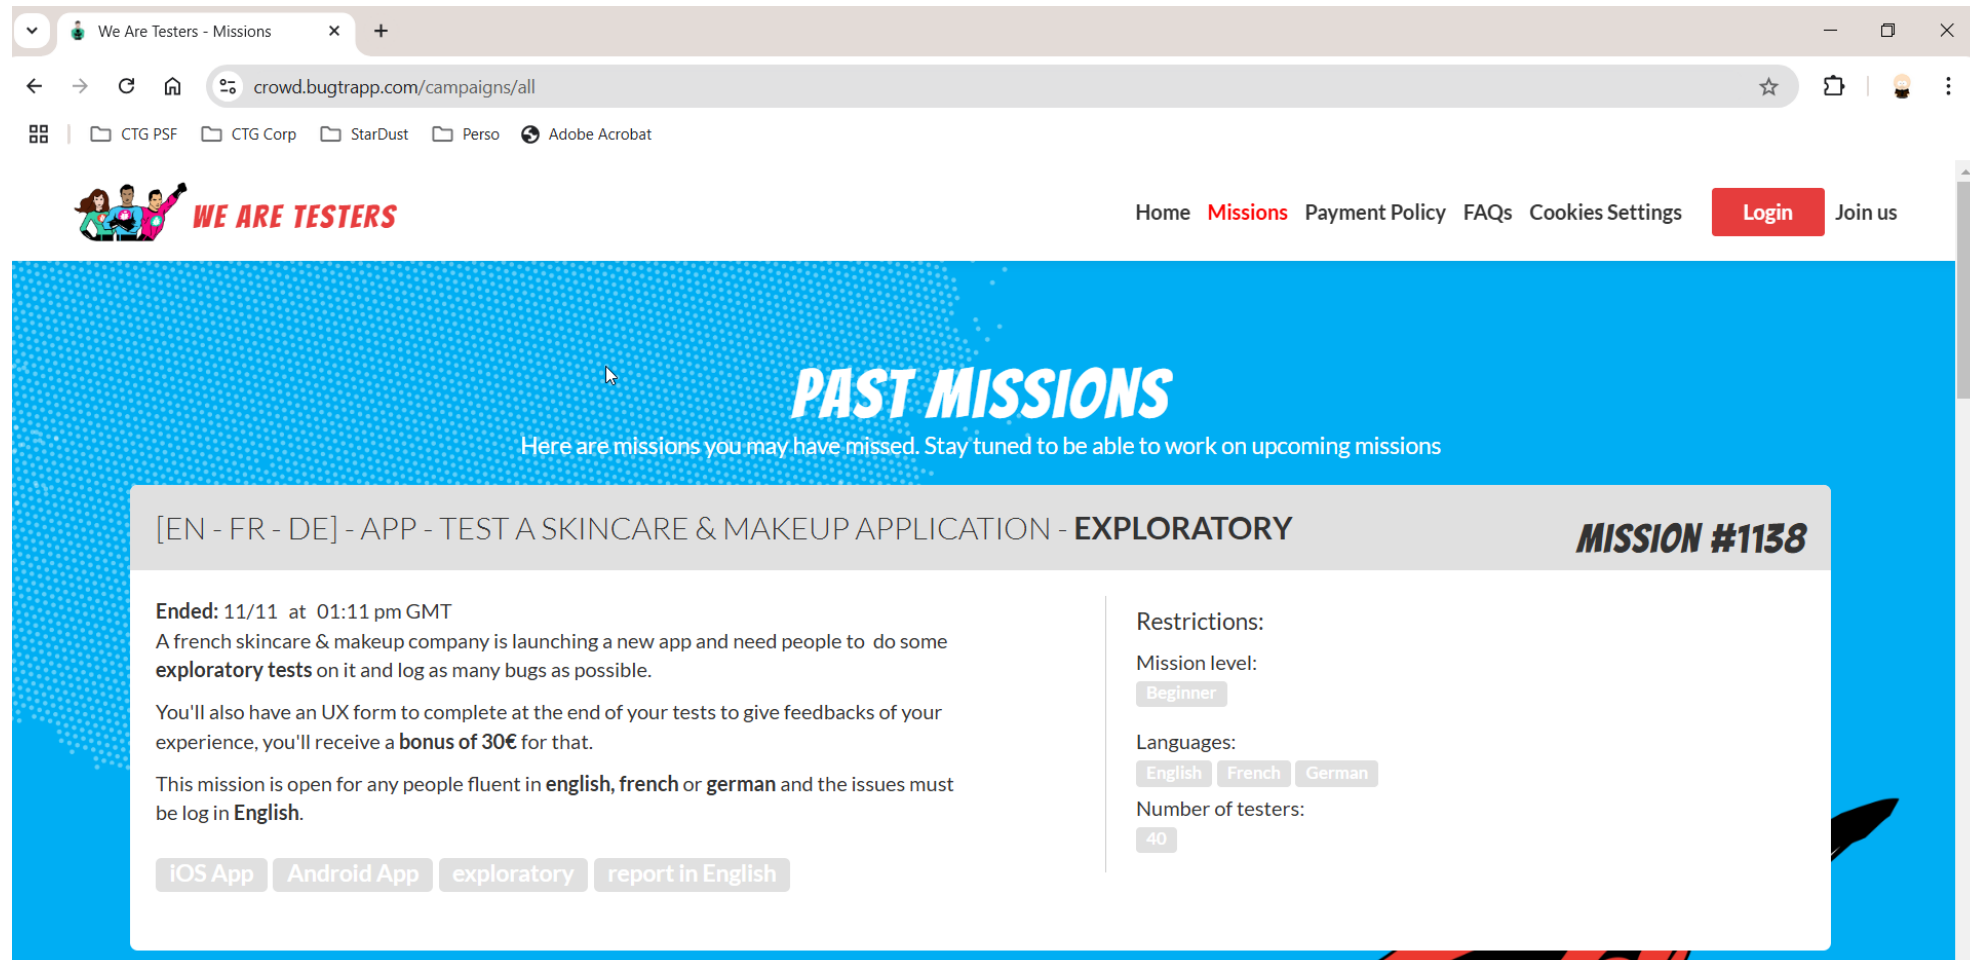

- **3000+ QA Professionals**

- Present in over 60 countries
- More than 50 languages spoken natively
- Real-world conditions
- (Geo)localized testing
- Flexible and scalable solution

- **4000+ Devices**

- Mobile Fleet, Managing Newness and Obsolescence
- Digital ecosystem to drive your testing

The platform

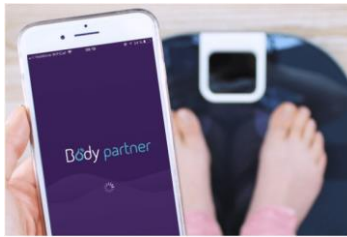

Multiple situations

Various clients, products, contexts, business objectives, solutions, approaches...

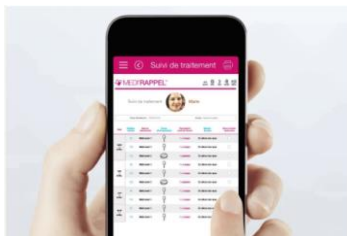

HAVAIANAS / RETAIL

Ecommerce Platform UAT
Hybrid Testing Approach **Full testing** support (Consulting, TestPlan, Tests...)

SEB / SMART HOME

IoT testing
2 countries / **55 devices**
15+ campaigns

BIOGARAN / HEALTH

App testing on 30 devices
Test scripts writing
Bug-Fix-Check support

LA REDOUTE / RETAIL

App **exploratory testing**
7 countries / **20 devices**
48h campaign

BNP PARIBAS / BANK

App testing on 23 devices
Hybrid Testing Approach
FR/US/CN localizations

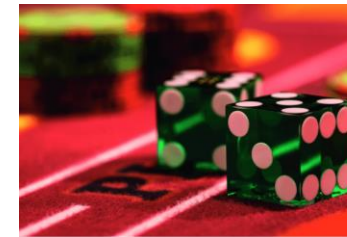

THALYS / TRANSPORT

Chatbot testing in FR/NL
Hybrid Testing Approach 3+ years of partnership

DANONE / INDUSTRY

Website testing
Agile testing approach
Multidevices bug bounty

PARTOUCHE / GAMES

Mobile Casino testing
280 steps writing & execution
10 mobile devices

AVIRA / SOFTWARE

Software solution testing
CrowdTesting in 8 countries
Bug Bounty & **User feedback**

The Process of a typical project

The Testing Approaches in Practice

Guided approach

Writing the Acceptance Criteria
Guided testing based on test steps
Visibility of executed paths during the campaign
+ possible foundation for Front-End Automation

The Benefits:

- Documentation & Transparency
- Knowledge Capitalization
- KPI & Measurement of Test Coverage

To **select or combine**
based on the
constraints &
challenges

Exploratory approach

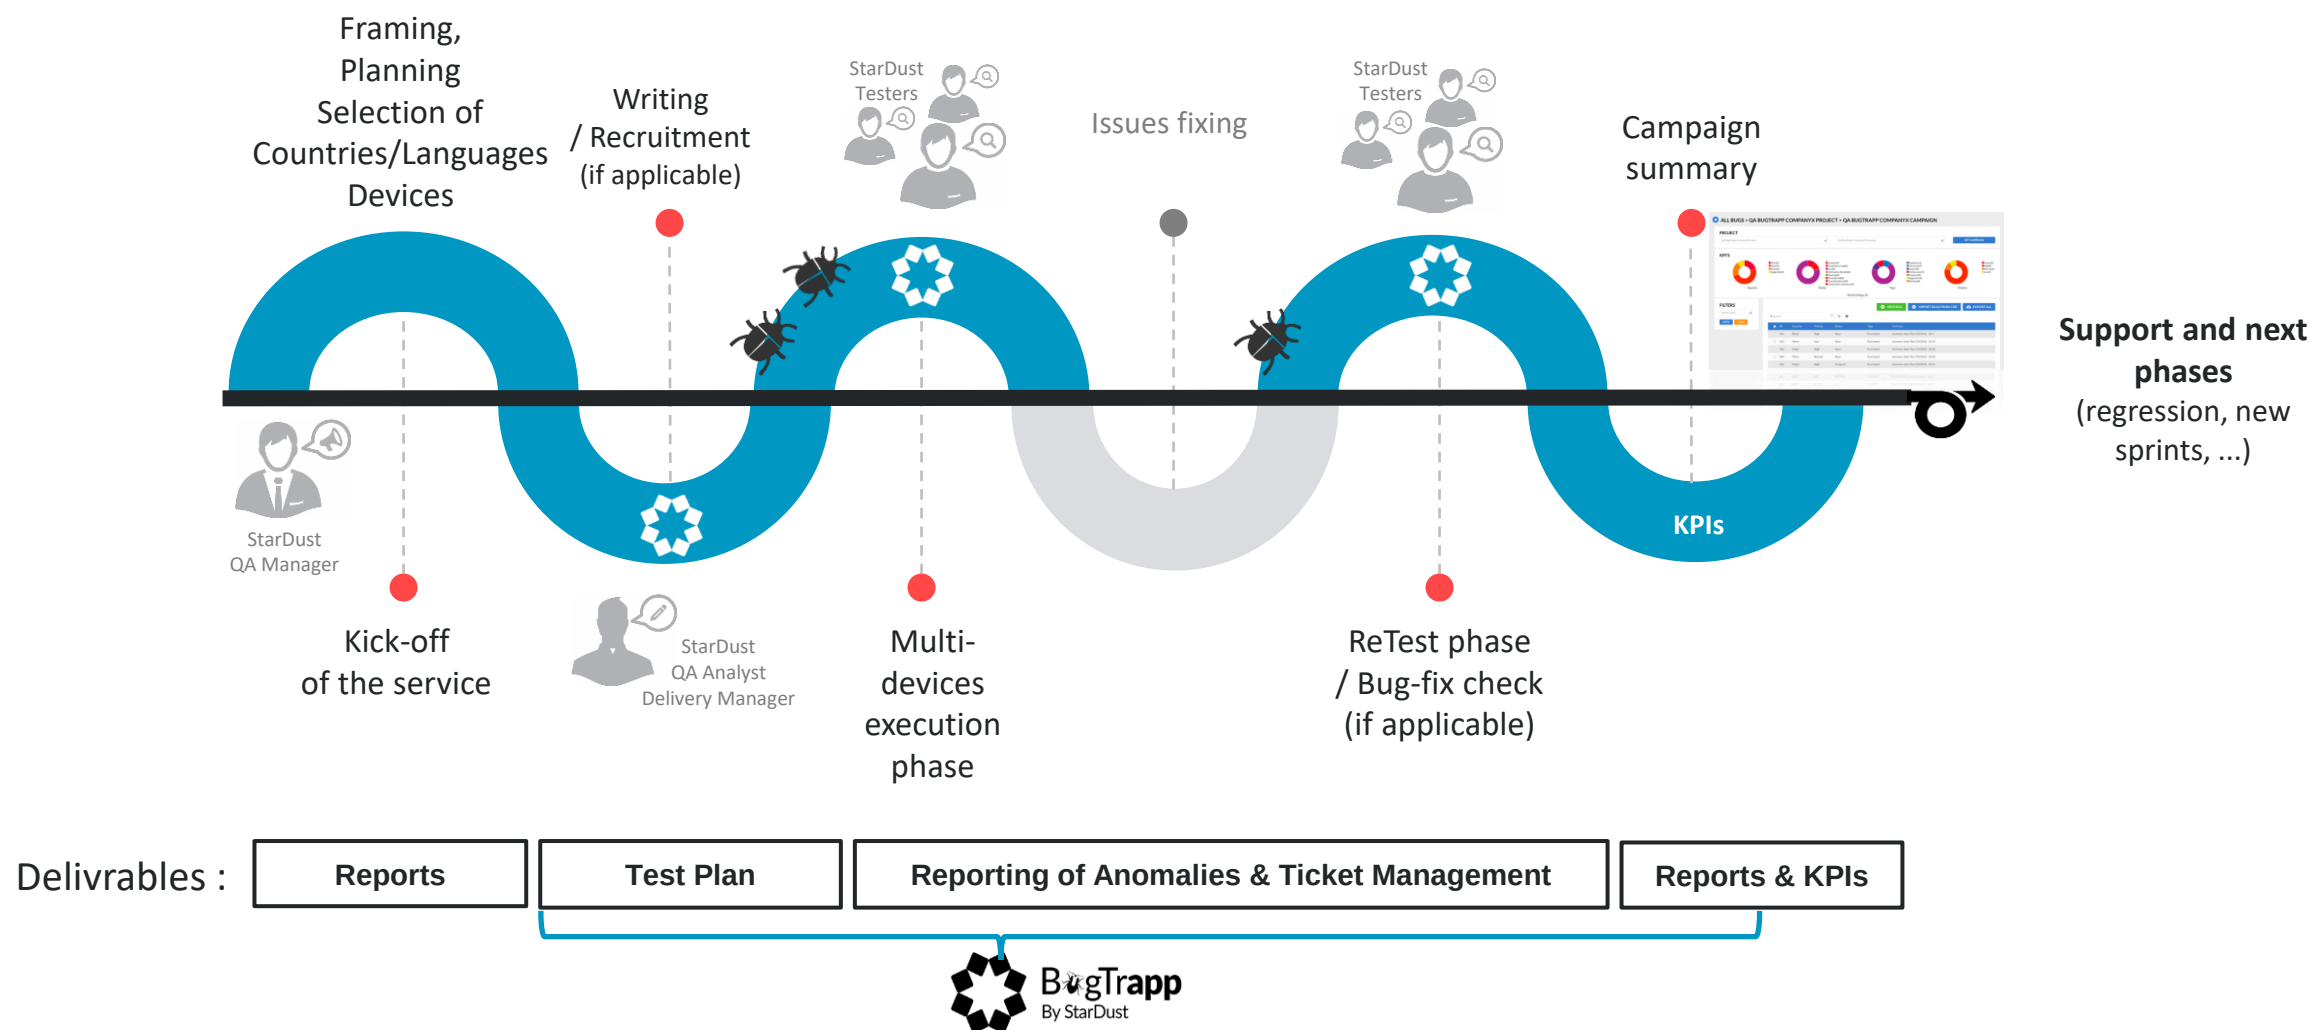

Macro Framing of the Campaign
Testing based on testers' experience with similar products
Optimization of testing time for the identification and documentation of anomalies
+ deepening insights into user habits and behaviors

The Benefits:

- Fast and efficient approach
- Documentation focused on encountered issues
- Execution flexibility

To secure the conversion funnel and the user experience
